[Stable Isotope Biogeochemistry in Laboratory Simulations of Europa](#) [#3650]

This study employs stable isotopes in laboratory simulations of Europa to evaluate the potential for detection of isotopic biosignatures.

[Operation of Pneumatically-Actuated Membrane-Based Microdevices Designed for In Situ Analysis of Extraterrestrial Organic Molecules After Prolonged Storage and Upside Down](#) [#3617]

Pneumatically-actuated membrane-based microdevices for in situ analysis of extraterrestrial organic molecules were operated upside down after prolonged storage.

[Strategies for Detecting Biological Molecules on Titan](#) [#3081]

Amino acids / Hiding in Titan's craters / Let's go collect them!

Blake D. F. Thompson K. Sarrazin P. Bristow T. Hoehler T. Quinn R.

[The Importance of Particle Induced X-Ray Emission \(PIXE\) Analysis and Imaging to the Search for Life on Ocean Worlds](#) [#3074]

Monte Carlo modeling shows that 244-Cm sources are optimal for XRF fluorescence and detection of the biogenic elements C, N, O, P, S in an icy water matrix.
