

NEW VIEWS OF THE MOON 2: PRINT ONLY ABSTRACTS

Garrick-Bethell I.

[*Lunar Swirls, Space Weathering, and Latitudinal Spectral Trends*](#) [#6087]

Lunar swirls are at the intersection of a number of fields in planetary science and provide insights into basic space weathering processes.

Garrick-Bethell I.

[*The Long Wavelength Structure of the Lunar Crust: Tidal-Rotational Origins and True Polar Wander*](#) [#6092]

The shape and crustal structure of the Moon records evidence of its early tidal and rotational state, as well as its history of true polar wander.
