PDS4: THE NEW PLANETARY DATA SYSTEM
10:50 a.m. Humphreys

Chair: Trent Hare

10:50 a.m. Crichton D. *
PDS4: The Next Generation Planetary Data System

11:20 a.m. Hughes J. S. * Hardman S.
[*PDS4 Product Search and Query Models*](#) [#7054]
The PDS4 Information Model defines the labels for PDS4 Products. A subset of the information in these labels, a query model, is harvested to support search services. This presentation describes query models how they configure the search service.

11:40 a.m. Guinness E. A. * Gordon M. K.
[*The Planetary Data System New Geometry Metadata Model*](#) [#7027]
The NASA Planetary Data System (PDS) has recently developed a new set of archiving standards based on a rigorously defined information model. An important part of the new PDS4 information model is the model for observational geometry metadata.
