

46th Lunar and Planetary Science Conference News and Blog Coverage #LPSC2015

- Empire State Tribune: [Moon's lava tunnel could potentially offer shelter from the harsh condition of the moon as futuristic bunkhouses, according to Scientists](#) (April 8)
- Universe Today: [There Could Be Lava Tubes on the Moon, Large Enough for Whole Cities](#) (April 7)
- Yibada: [Long Term Shelter Possible on Moon Trips by Existing Lava Tunnels](#) (April 7)
- Fox News: [Strange 'hollows' on Mercury revealed by NASA probe as mission end nears](#) (April 6)
- Spaceflight Now: [Diverse destinations considered for new interplanetary probe](#) (April 6)
- Uncover California: [Lava tunnels could provide shelter for long-term moon missions: Study](#) (April 6)
- Space.com: [Mars Mystery: Does Flowing Water Cause Red Planet's Dark Streaks?](#) (April 3)
- Planetary Society: [The Lunar Chronology: What Happens When Science Does Its Thing](#) (April 1)
- Space.com: [Lunar Lava Tubes Might Make Underground Moon Cities Possible](#) (April 2)
- New Scientist: [The moon's got two tails – and its friends might too](#) (March 31)
- Red Orbit: [Bizarre bulge discovered on Ganymede](#) (March 30)
- Yahoo News: [Ancient Moon Crater Named After Amelia Earhart](#) (March 30)
- Clapway: [Ceres Is Ready For Her Close Up](#) (March 29)
- Space.com: [NASA Moon Orbiter, Mars Rover Face Budget Chopping Block](#) (March 27)
- Io9: [Ganymede's Bizarre Bulge Baffles Scientists](#) (March 27)
- National Geographic: [Bizarre Bulge Found on Ganymede, Solar System's Largest Moon](#) (March 26)
- Examiner.com: [Spirit rover: more evidence for ancient hot springs on Mars](#) (March 26)
- Bad Science: [Science Conferences \(#LPSC2015\), Ivory Gates, and Who Gets In](#) (March 26)
- Planetary Society: [LPSC 2015: Aeolian Processes on Mars and Titan](#) (March 26)
- Planetary Society: [LPSC 2015: MESSENGER's low-altitude campaign at Mercury](#) (March 26)
- New Scientist: [Dwarf planet Ceres might have right stuff for life](#) (March 25)
- News @ Wesleyan: [Students, Faculty, Alumni Attend Planetary Science Conference in Texas](#) (March 25)
- Wall Street OTC: [Massive lunar crater to be named after aviation pioneer Amelia Earhart](#) (March 25)
- D News: [After Pluto, where will NASA's New Horizons go?](#) (March 25)
- Science World Report: [New clues from chondrites reveal the history of the solar system](#) (March 25)
- National Geographic: [A vanishing island, an alien mudball, and the search for life on Enceladus](#) (March 25)
- Sydney Morning Herald: [Cities in the Moon: huge subterranean lava tubes could make lunar colonisation possible](#) (March 25)
- Nature: [Seven days: 20–26 March 2015: The week in science](#) (March 25)
- New Scientist: [NASA's Curiosity rover finds fatty acids on Mars](#) (March 25)
- ASU Center for Meteorite Studies: [CMS at Lunar and Planetary Science Conference!](#) (March 24)
- IGN: [Researchers Claim Giant Lava Tubes on Moon Could Support Cities](#) (March 24)
- EarthSky: [Dwarf planet Ceres gets place names](#) (March 24)

- Science Post: [Le mystère des points lumineux sur Cérés probablement résolu: des geysers de glace!](#) (March 24)
- Planetary Society: [Big news from little worlds](#) (March 24)
- Cosmos Newsblog: [Is the Ceres bright spot caused by a plume of gas?](#) (March 24)
- National Geographic: [Small, shrinking Mercury is a planetary space oddity](#) (March 24)
- MESSENGER: [Highlights from down low](#) (March 23)
- New Scientist: [Swiss cheese is not a sign of Martian climate change](#) (March 23)
- Red Orbit: [Fatty acids may have been found on Mars](#) (March 23)
- Clapway: [Help name craters and mountains on Pluto](#) (March 23)
- Hot Air: [The future is today: Force fields and underground lunar colonies in the news](#) (March 23)
- Huffington Post Greece: [Πιθανή ύπαρξη σπηλαίων που θα μπορούσαν να φιλοξενήσουν ολόκληρες πόλεις στη Σελήνη](#) (March 23)
- Red Orbit: [The future of the New Horizons spacecraft](#) (March 22)
- io9: [After Pluto, where will NASA's New Horizons go?](#) (March 22)
- National Geographic Italia: [Aiuto, ci si è ristretto Mercurio](#) March 22)
- Gizmag: [Study claims lunar caverns could hold city-size colonies](#) (March 22)
- SpaceToday.net: [MAVEN detects unusual aurora, dust cloud](#) (March 21)
- Forbes: [NASA surprised by Chelyabinsk Russian meteor fragments](#) (March 21)
- Red Orbit: [Rosetta's comet may be made up entirely of pebbles: scientists](#) (March 21)
- Zazoom Social News: [Rosetta e Philae alla LPSC 2015](#) (March 21)
- Sci-News.com: [Earhart Crater: Newly-discovered lunar crater named after legendary American pilot](#) (March 21)
- BBC News: [Possible fatty acid detected on Mars](#) (March 20)
- grenz|wissenschaft-aktuell: [Mysteriöse "weiße Flecken" auf Zwergplaneten Ceres ragen über Kraterwand hinaus](#) (March 20)
- Laboratory Equipment: [Huge lava tubes may exist on Moon](#) (March 20)
- Scientific Computing: [Lunar volcano's enormous eruption reached hundreds of miles](#) (March 20)
- BBC News: [Ceres: Possible plume hints at active world](#) (March 20)
- Space Daily: [Other Asteroids Contributed Elusive Olivine to Vesta](#) (March 19)
- Planetary Society: [Slides from the LPSC 2015 Session on the Community Response to NASA's Budget Request](#) (March 19)
- Space.com: [Aurora 'Christmas lights' on Mars spotted by NASA spacecraft](#) (March 19)
- The Weather Network: [Strange 'snow carrots' found at meteorite impact site](#) (March 19)
- Space.com: [Leak in Mars rover Curiosity's wet chemistry test finds organics](#) (March 19)
- Purdue Newsroom: [Theoretical study suggests huge lava tubes could exist on Moon](#) March 19)
- Clapway: [MAVEN finds dust clouds, aurorae At Mars](#) (March 19)
- grenz|wissenschaft-aktuell: [Sonde entdeckt tiefreichende Polarlichter und mysteriöse Staubwolke über dem Mars](#) (March 19)
- Gazeta.ru: [Астрономы узнали, откуда на Луне взялась ториевая аномалия](#) (March 19)
- Science: [Lopsided ice on the Moon points to past shift in poles](#) (March 19)
- Planetary Society: [LPSC 2015: "Bloggers, please do not blog about this talk."](#) (March 19)

- Daily Mail: [Man UNDER the Moon: Humans could live in lava tunnels underneath the lunar surface, study finds](#) (March 19)
- Planetary Society: [LPSC 2015: First results from Dawn at Ceres: provisional place names and possible plumes](#) (March 19)
- Bangladesh News: [NASA mission detects mysterious dust cloud on Mars](#) (March 19)
- American Register: [Ceres might have a volcano](#) (March 19)
- Tech Times: [If there are lava tubes on the Moon, could we live inside them?](#) (March 19)
- Empire State Tribune: [Stronger evidence that there is life in Ceres as Dawn begins to crack the mystery of shiny spots](#) (March 19)
- Empire State Tribune: [Ceres Dawn encounter: A journey in search for life](#) (March 19)
- Clarksville Online: [NASA's MAVEN spacecraft discovers dust cloud and aurora in Mars' atmosphere](#) (March 19)
- Astronomy Now: [Mysterious Martian dust cloud and aurora detected by NASA spacecraft](#) (March 19)
- ExecutiveBiz: [NASA's Lockheed-built MAVEN spacecraft observes dust cloud, aurora on Mars](#) (March 19)
- 9 News (Australia): [NASA spacecraft detects mysterious dust cloud and aurora around Mars](#) (March 19)
- Charter97.org: [Ученые раскрыли тайну Ториевой аномалии на Луне](#) (March 19)
- The Silver Ink: [Ceres bright spots are icy volcanoes?](#) (March 19)
- Popular Science: [Newly discovered lunar crater named after Amelia Earhart](#) (March 19)
- International Business Times: [Lava tubes on Moon have potential to provide shelter for human colony](#) (March 19)
- Frontier Post: [Ceres: Possible plume hints at active world](#) (March 19)
- Northern Echo: [Giant lunar eruption revealed](#) (March 18)
- Denver Post Business: [CU-Boulder's MAVEN mission finds early surprises in Martian atmosphere](#) (March 18)
- Scientific American: [Bright spots on Ceres could be active ice](#) (March 18)
- PR Newswire: [NASA spacecraft detects aurora and mysterious dust cloud around Mars](#) (March 18)
- EurekAlert: [Extent of Moon's giant volcanic eruption is revealed](#) (March 18)
- Planetary Society: [LPSC 2015: Philae at comet Churyumov-Gerasimenko](#) (March 18)
- EarthSky: [Aurora and mysterious dust cloud around Mars](#) (March 18)
- BBC News: [Is Titan submarine the most daring space mission yet?](#) (March 18)
- Lafayette Journal & Courier: [Purdue researchers name Moon crater after Earhart](#) (March 18)
- Phys.org: [MARSDROP microprobes could expand spacecraft mission capabilities](#) (March 18)
- Media INAF: [Sorprese dall'atmosfera di Marte](#) (March 18)
