International Observe the Moon Night (InOMN) is an annual worldwide celebration of lunar and planetary science and exploration, sponsored by NASA’s Lunar Reconnaissance Orbiter mission. One day each year, everyone on Earth is invited to unite to observe and learn about the Moon and its connection to planetary science and share personal and community connections we all have to the Moon.

Through InOMN, audiences:
1) Gain access to NASA content and subject matter experts.
2) Are inspired to learn more about NASA science and exploration.
3) Are provided with the resources and opportunities to see themselves as citizens of the Solar System.

Each year thousands of people participate in InOMN at museums, planetaria, schools, universities, observatories, parks, private businesses, and backyards around the world.

Get involved: Go look at the Moon! Invite your family, friends, and community to join you.

For more information, activities, an annually-updated InOMN Moon map, and other resources, visit the InOMN website.
