To Submit an E-Poster —

Poster presenters are encouraged to upload an electronic file of their poster(s). Our interactive e-poster system provides additional exposure by giving fellow attendees, as well as those who were unable to attend the meeting, the ability to view posters online. Presenters are strongly encouraged to take advantage of this opportunity to increase the visibility of their research.

The deadline for uploading e-posters is **Friday, August 11, 2017**. Poster presenters will only be allowed to submit a file ONCE, so make certain that all typos have been corrected before uploading the file.

Uploading an e-poster is as easy as uploading an abstract:

1. Login to the abstract submission page of the USRA/LPI Meeting Portal (https://www.hou.usra.edu/meeting_portal/abstract_submission/)
2. Next to the listing of your MetSoc abstract that was assigned to a poster session, you'll see an  link in the ACTION column
3. Click on this link to go to the e-poster upload page
 - a. All e-posters must be submitted in PDF format
 - b. The maximum file size allowed is 6.0 MB
4. After using the browse button to locate the file containing your e-poster on your computer, and selecting an appropriate copyright statement, click the "Submit" button ONCE and WAIT for the confirmation screen
5. You will receive a confirmation e-mail with a direct link to your e-poster, or you can view any e-posters that have been submitted by visiting <http://www.hou.usra.edu/meetings/metsoc2017/eposterindex.cfm>

You can also use the [abstract search database](#) to find a particular abstract; those with e-posters will have an additional link in the search result for viewing the associated e-poster.
